

Solid Recovered Fuel – By SRCL

ALTERNATIVE TREATMENT

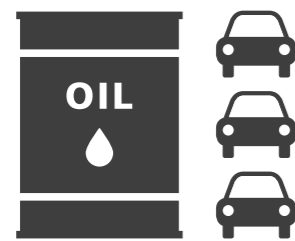

Alternative Treatment is the heating of waste to disinfect it, as an alternative to incineration. As part of the alternative treatment process the waste is shredded to render it unrecognisable.

SRCL Solid Recovered Fuel (SRF)
= **98,129 tonnes**
(recovered from 2011 – 2014)

WHAT DOES THIS MEAN?

*based on an average fuel tank size of 53 litres

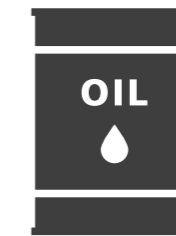

1 X BARREL = 159 litres of fuel OR 3 x cars*

WHY IS SRF GOOD?

*gigajoule per tonne as per barrel of oil equivalents

SRF Burn Value = 25 GJ/tonne*

BOE† = 6.1 GJ/barrel

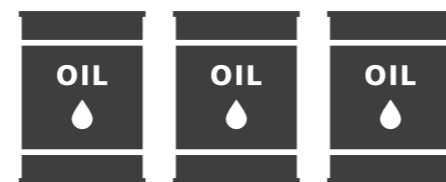

†The barrel of oil equivalent (BOE) is a unit of energy based on the approximate energy released by burning one barrel (42 U.S. gallons or 158.9873 litres) of crude oil.

SRCL SRF

98,129 tonnes

=

Energy equivalent of 402,168 Barrels

OR

Or 1,206,504 cars!

And that is why we love SRF!
